Creditable Coverage Notice About Your Prescription Drug Coverage and Medicare

*The following information is for
Medicare eligible members and concerns
your current prescription drug coverage
with NDPERS under Medicare Part D.*

Because it has been determined that your existing coverage is on average at least as good as the standard Medicare prescription drug coverage, you can keep this coverage and not pay extra if you later decide to enroll in Medicare coverage.

Individuals with Medicare have the option to enroll in a Medicare prescription drug plan. However, because you have existing prescription drug coverage that, on average, is as good as Medicare coverage, you can choose to join a Medicare prescription drug plan later without paying late enrollment penalties. In addition, your current coverage pays for other health expenses, in addition to prescription drugs, and you will not be eligible to receive all of your current health and prescription drug benefits if you choose to

enroll in a Medicare prescription drug plan. Before making your decision, please examine all your options to be sure you understand the plan coverages.

If you do decide to enroll in a Medicare Prescription drug plan you must drop your NDPERS coverage. Be aware that you may not be able to get this coverage back.

If you drop your current coverage, you will only be able to re-enroll if you apply for coverage within 31 days from any one of the following “qualifying events”:

1. Date of retirement, defined as either:
The last day of active employment if member does not defer his/her retirement benefit or take a lump-sum refund of his/her retirement account, or

Premium Increase and Plan Enhancement

The following information applies only to those Medicare eligible members currently enrolled in the Dakota Retiree Plan. This information DOES NOT apply to you if you are not enrolled in the NDPERS health plan.

Your NDPERS Dakota Retiree Plan includes coverage for both health and prescription drug benefits. The NDPERS Dakota Retiree Plan is a “Carve-Out” plan that pays secondary to Medicare. While it is not a supplemental plan, it does provide coverage on unpaid claims by Medicare Part A and Part B and provides prescription drug coverage under Medicare Part D.

Premium Increase

Effective January 1, 2006 NDPERS implemented a new Prescription Drug Program (PDP) in conjunction with your health coverage in order to satisfy Medicare Part D requirements. The drug coverage remained very similar to your drug coverage prior to January 1, 2006 with the exception of some mandated drug coverage guidelines. With this change NDPERS received a subsidy from the Federal government which is used to offset the actual premium amount. A subsidy is allowed for each person on the policy who is enrolled in Medicare. Due to an adjustment to the annual Medicare subsidy, you will have a premium increase effective January 1, 2007.

You will be glad to hear that there have been some enhancements to your prescription drug coverage. We have added a

Supplemental Benefit which is an add-on drug list in order to cover drugs that were formerly excluded by Medicare. This will include coverage for benzodiazepines (e.g. Valium, Xanax, Ativan, etc.), barbiturates, and drugs used for coughs and colds. The benefit payment level for these supplemental drugs is 25% coinsurance with no copayment.

You will receive a notice at your address of record in late November notifying you of your new rate effective January 1, 2007. If you are residing at a different address during the winter months, be sure to update your mailing address or your forwarding order. Address changes must be in writing and include your social security number, signature and effective date of the change.
